

INDUSTRIAL AUTOMATION

ELMAC is aimed at companies operating especially in the industrial cabling sector. Among its products we include automotive connectors, terminals and connectors, fastin and faston, heat shrinkable, pre-insulated equipment and extractor inserters.

CEM, sole distributor of NVENT branded products for Italy, manufacturer of electrical cabinets, boxes and junction boxes for industrial applications. The range of electrical cabinets comes with different types of materials including stainless steel and anti-interference execution, (EMC)

PALMER INSTRUMENTS and WAHL INSTRUMENT have teamed up to offer a complete line of temperature, pressure, test and calibration instruments. Paper recorders, static temperature labels, digital thermometers, optical pyrometers and much more for measuring control.

We also supply the following brands

Special pre-wired cables for drives, motors and encoders
Electrical resistors of all types
And we perform calibration services for instruments and sensors

Laboratory or on-site checks of temperature sensors and instrumentation using ACCREDIA certified second-line calibrators and sensors

INDUSTRIAL AUTOMATION

BORSAN offers a wide range of standard and special cables suitable for various sectors of interest and characterized by excellent quality. The markets of interest are vast: Medical - Military - Automation - Construction - Industrial Robotics - Naval - Telecommunications - Railways.

BORSAN GROUP consists of 17 companies operating in 7 different sectors, with over 2000 employees and exports to over 65 countries on 3 continents.

Electronics for control and regulation measurement technology.

- Amplifiers, analog switches -
- Optocouplers -
- Control equipment -
- Level converters -

General purpose, modular and industrial rotary counters, timers and encoders for heavy duty, explosion proof (Cat. ATEX) and Field Bus applications

System safety for man and machine.

- Safety sensors -
- Safety barriers -
- Electric locks -
- Safety relay -

ELAN, part of the SCHMERSAL group, produces control and signaling devices for the safety of people in danger areas of machines and systems

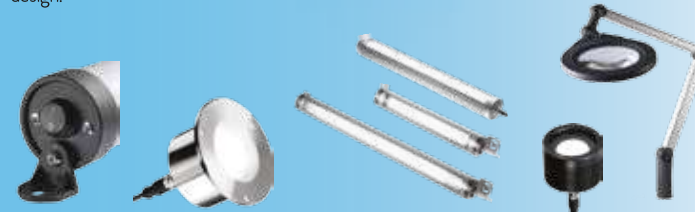

INDUSTRIAL AUTOMATION

TEXA Industries s.r.l. : air conditioners, exchangers, fans, heaters, chillers and fans.

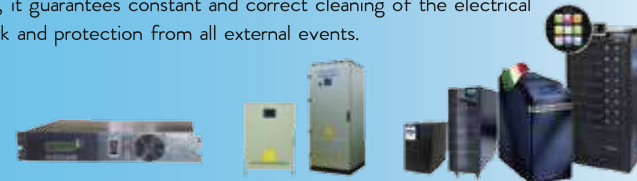

- Refrigeration systems for oil and water
- Air conditioning systems for electrical cabinets and telecommunications
- Ventilation groups

LED2WORK offers a wide range of LED lamps for industrial and medical applications, which meet the quality requirements in quality factories, laboratories, offices and other workplaces with modern LED solutions, integrated in every context and with an exclusive design.

Production and distribution of static uninterruptible power supplies (UPS), rescuers, rectifiers, stabilizers, frequency converters and generating sets. The Uninterruptible Power Supply (UPS) is the only tool that really protects the network. By separating the applied load from the energy source, it guarantees constant and correct cleaning of the electrical network and protection from all external events.

It produces and markets components for the electrical cabinet, interfacing and active and passive systems for the machine.

- Connection systems
- Systems for anti-interference / EMC technical automation
- Active and passive interfaces
- Field bus
